

# Reasoning & Communication in Mathematical Problem-Solving

24 March 2023

By Mdm Leong Fong Fong

**Why  
Reasoning and  
Communication is important  
in the Primary Mathematics  
Classroom?**

# 2021 Primary Mathematics Syllabus

## Primary Mathematics Curriculum

Primary education is a stage where students acquire important basic numeracy as well as develop logical reasoning and problem-solving skills that are required in many disciplines. It lays the foundation for the learning of mathematics for all students, equipping them with a tool for everyday life and the knowledge and skills for learning mathematics at the next level. It is also a stage where students' confidence and interest in the subject are built and their attitudes towards the discipline are shaped.

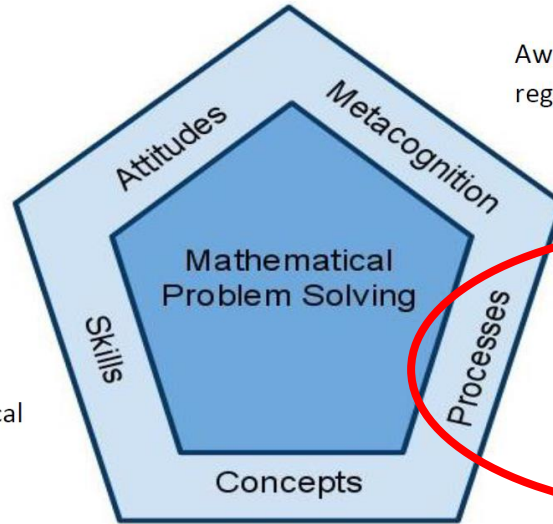

For these reasons, the Primary Mathematics Syllabus aims to enable all students to:

- acquire mathematical concepts and skills for everyday use and continuous learning in mathematics;
- develop thinking, reasoning, communication, application and metacognitive skills through a mathematical approach to problem solving; and
- build confidence and foster interest in mathematics.

# Mathematics Curriculum Framework

Belief, appreciation,  
confidence, motivation,  
interest and perseverance

Awareness, monitoring and  
regulation of thought processes

Proficiency in carrying out  
operations and algorithms,  
visualising space, handling  
data and using mathematical  
tools

Competencies in abstracting  
and reasoning, representing  
and communicating,  
applying and modelling

Understanding of the properties and  
relationships, operations and  
algorithms

# Mathematical Reasoning

refers to the ability to think, understand and form opinions or judgements that are based on facts.

# Communication

refers to the ability to use mathematical language to express mathematical ideas and arguments precisely, concisely and logically.

# How do we infuse Mathematical Reasoning and Communication in Problem-solving?

## Elicit

Elicit your child's reasoning with the help of appropriate question prompts.

# True / False / Not Possible To Tell

<b>True</b>	The statement agrees with the information given all the time.
<b>False</b>	The statement contradicts the information given.
<b>Not Possible To Tell</b>	<p>There is not enough information on this.</p> <p>The statement can sometimes be true and sometimes be false.</p>

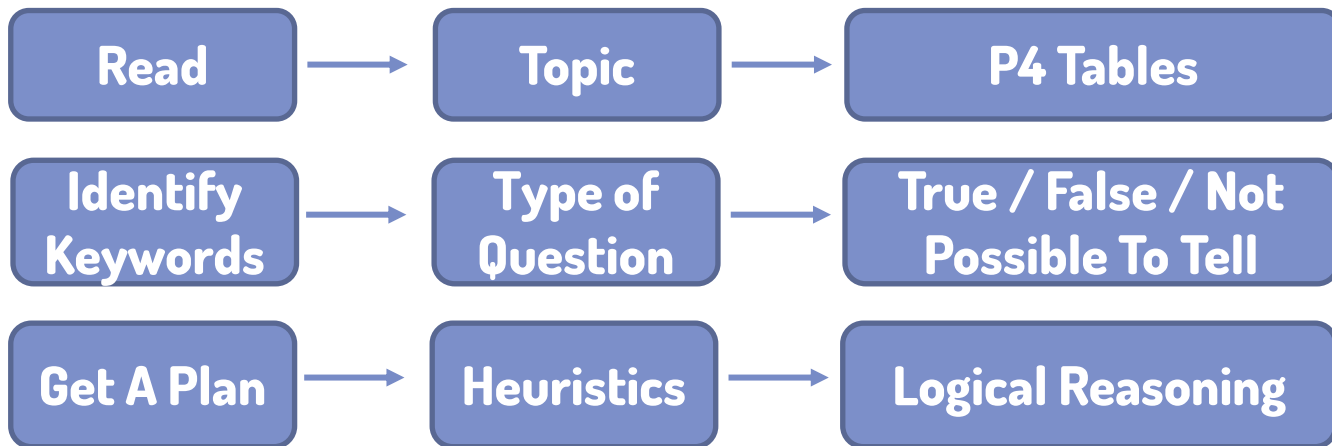

OR

**Q1)****PSLE 2020 Paper 1 Booklet B**

The table shows the number of storybooks read by each pupil in a group. Part of the table is covered by an ink blot. There were 45 pupils who read at least 2 storybooks.

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

Each of the statements is either true, false or not possible to tell from the information given. For each statement, put a tick (✓) to indicate your answer.

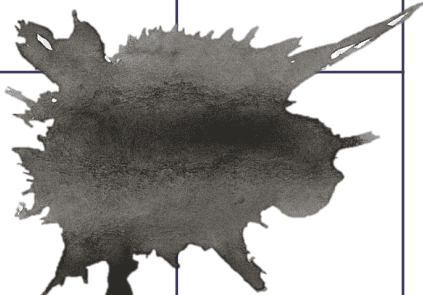

Q1)

The table shows the number of storybooks read by each pupil in a group. Part of the table is covered by an ink blot. There were 45 pupils who read at least 2 storybooks.

Number of pupils who read 2, 3 or 4 storybooks.

2, 3 or 4 storybooks

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

**READ**

- ☐ What is known?
- ☐ What is unknown?
- ☐ What do you need to find?

**IDENTIFY KEYWORDS**

- ☐ Are there any keywords that leads to the type of question or concept?

45

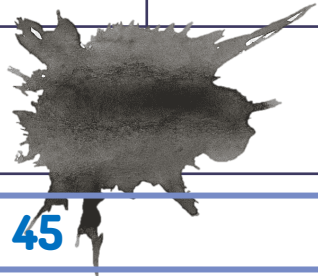

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

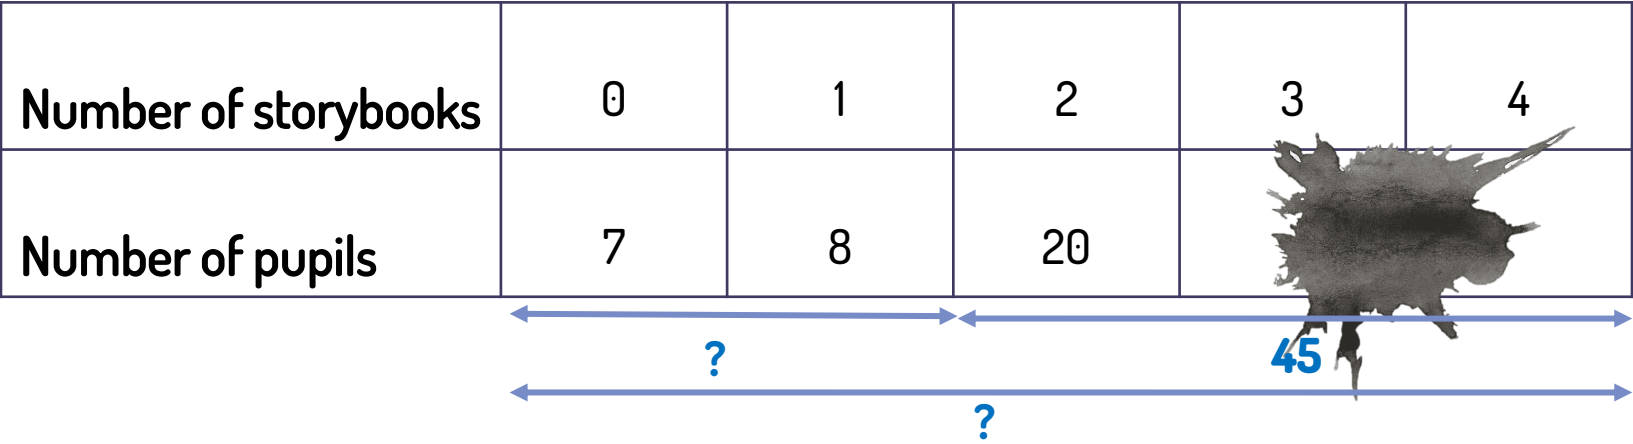

Diagram showing the distribution of storybooks read by pupils:

- 0 storybooks: 7 pupils
- 1 storybook: 8 pupils
- 2 storybooks: 20 pupils
- 3 storybooks: ? pupils
- 4 storybooks: ? pupils

Arrows indicate the total number of pupils is 45.

Each of the statements is either true, false or not possible to tell from the information given. For each statement, put a tick (✓) to indicate your answer.

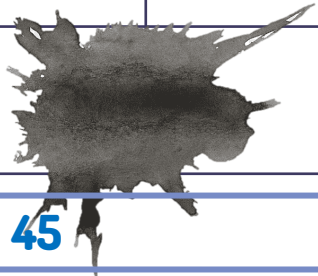

Statement	True	False	Not Possible To Tell
7 pupils did not read any storybooks.	✓		

Each of the statements is either true, false or not possible to tell from the information given. For each statement, put a tick (✓) to indicate your answer.

Statement	True	False	Not Possible To Tell
There were 80 pupils in the group. <div>total</div>	<div>GET A PLAN</div> <div><div><input type="radio"/> Have you seen it before?</div><div><input type="radio"/> What strategy would you use?</div><div><input type="radio"/> Is there other ways to solve this question?</div></div>	<div>HAVE IT DONE</div> <div><div><input type="radio"/> Is each step correct?</div><div><input type="radio"/> Can you prove that each step is correct?</div><div><input type="radio"/> What makes you say that?</div></div>	

Q1)

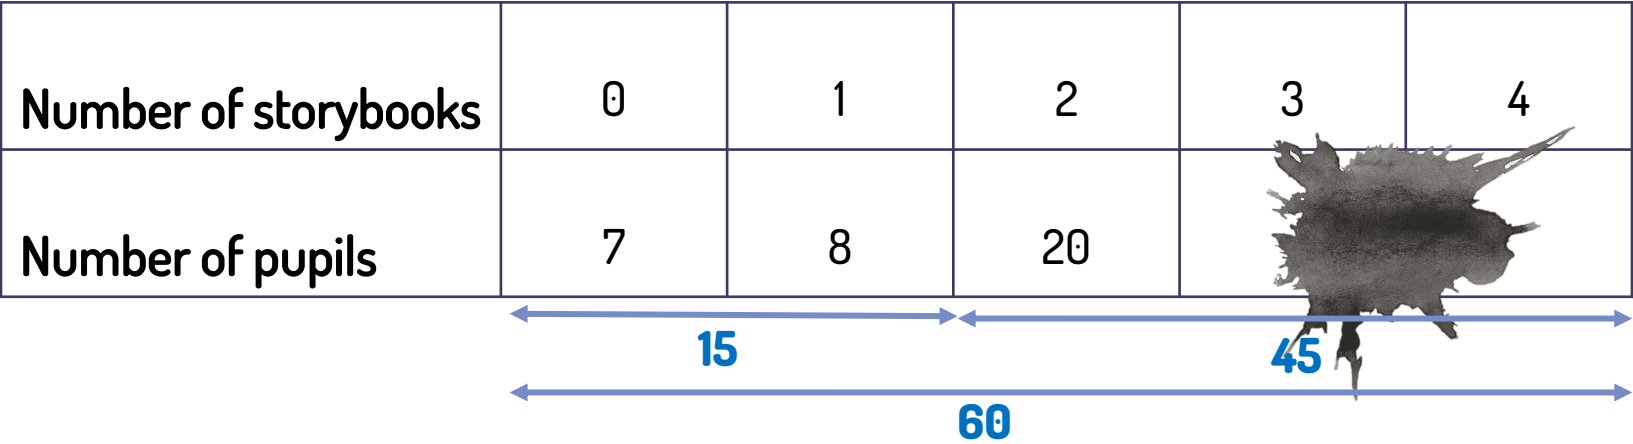

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

<

**Number of pupils who read 0 and 1 storybooks  $\rightarrow 7 + 8 = 15$**

**Total number of pupils  $\rightarrow 15 + 45 = 60$**

I DO

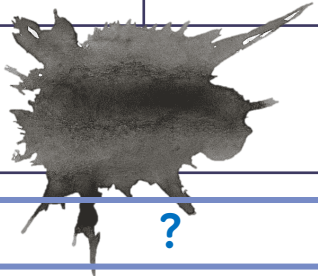

Statement	True	False	Not Possible To Tell
There were 80 pupils in the group. total		✓	

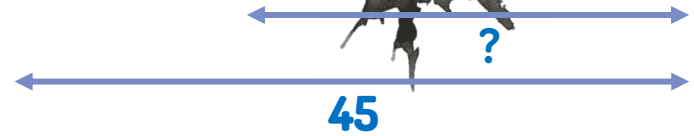

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

Statement	True	False	Not Possible To Tell
<p>The number of pupils who read 3 storybooks was <b>same</b> to the number of pupils who read 4 storybooks.</p>			

What makes you say that?

Q1)

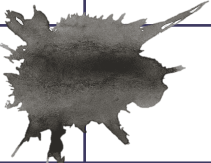

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

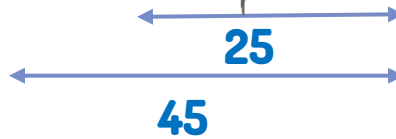

**Number of pupils who read 3 and 4 storybooks  $\rightarrow 45 - 20$   
 $= 25$**

I DO

Q1)

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

### HAVE IT DONE

- ☐ Is each step correct?
- ☐ Can you prove that each step is correct?
- ☐ What makes you say that?

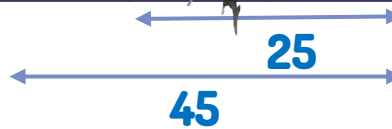

Statement	True	False	Not possible to tell
The <u>number</u> of pupils who read <u>3</u> storybooks was <u>equal</u> to the number of pupils who read 4 storybooks.			

**There are 25 pupils who read 3 and 4 books.**

**Is it possible for the two categories to have the same number of students?**

Q1)

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

### HAVE IT DONE

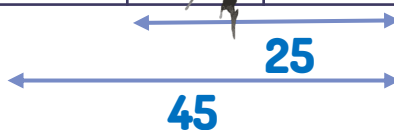

- ☐ Is each step correct?
- ☐ Can you prove that each step is correct?
- ☐ What makes you say that?

Statement	True	False	Not possible to tell
The number of pupils who read 3 storybooks was equal to the number of pupils who read 4 storybooks.		✓	

If the number of pupils who read 3 and 4 storybooks are the same, this would mean there are  $25 \div 2 = 12.5$  students. The number of pupils must be a whole number, therefore, the statement is false.

Q1)

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

## HAVE IT DONE

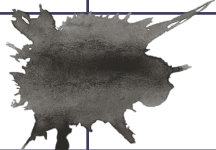

- ☐ Is each step correct?
- ☐ Can you prove that each step is correct?
- ☐ What makes you say that?

Statement	True	False	Not possible to tell
The number of pupils who read 3 storybooks was equal to the number of pupils who read 4 storybooks.		✓	

**25 is an odd number and not divisible by 2.**

**The number of pupils must be a whole number, therefore, the statement is false.**

Q1)

Number of storybooks	0	1	2	3	4
Number of pupils	7	8	20		

  
 25  
  
 45

Statement	True	False	Not possible to tell
The number of pupils who read 3 storybooks was equal to the number of pupils who read 4 storybooks.		✓	

### TRIPLE CHECK

☐ Is the solution reasonable?

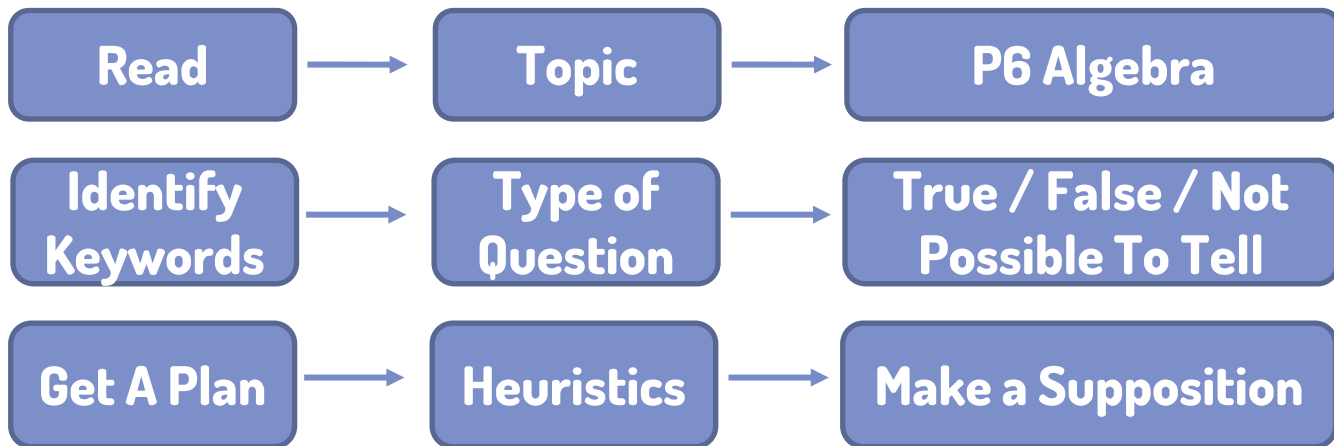

☐ Can you show that the solution is correct?

## Q2) PSLE 2018 Paper 2

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

Each of the statements is either true, false or not possible to tell from the information given. For each statement, put a tick (✓) to indicate your answer.

Statement	True	False	Not possible to tell
Ali collected the most number of bottles.			

Q2)

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

Each of the statement is either true, false or not possible to tell from the information given. For each statement, put a tick (✓) to indicate your answer.

Statement	True	False	Not possible to tell
Ali collected the most number of bottles.			
Bala collected more bottles than Carl.			
The 3 boys collected $3m + 19$ bottles altogether.			

Q2)

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

**Given:**

Number of bottles collected by Ali  $\rightarrow 17$

Number of bottles collected by Bala  $\rightarrow 2m$

Number of bottles collected by Carl  $\rightarrow (2 + m)$

**Unknown:**

The value of  $m$ .

**READ**

- ☐ What is known?
- ☐ What is unknown?
- ☐ What do you need to find?

Q2)

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

Statement	True	False	Not possible to tell
Ali collected the most number of bottles.	✓		✓

If  $m = 5$ ,  
Bala collected  $\rightarrow 2 \times 5$   
 $= 10$   
Carl collected  $\rightarrow 2 + 5$   
 $= 7$

### READ

- ☐ What is known?
- ☐ What is unknown?
- ☐ What do you need to find?

### GET A PLAN

- ☐ Have you seen it before?
- ☐ What strategy would you use?
- ☐ Is there other ways to solve this question?

### IDENTIFY KEYWORDS

- ☐ Are there any keywords that leads to the type of question or concept?

**Make A Supposition**

Q2)

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

Statement	True	False	Not possible to tell
Ali collected the most number of bottles.	✓		✓

If  $m = 5$ ,  
Bala collected  $\rightarrow 2 \times 5$   
 $= 10$   
Carl collected  $\rightarrow 2 + 5$   
 $= 7$

If  $m = 10$ ,  
Bala collected  $\rightarrow 2 \times 10$   
 $= 20$   
Carl collected  $\rightarrow 2 + 10$   
 $= 12$

**Make A Supposition**

**HAVE IT DONE**

- ☐ Is each step correct?
- ☐ Can you prove that each step is correct?
- ☐ What makes you say that?

As the value of  $m$  was not provided in the question, we cannot conclude whether Ali has collected the most number of bottles.

Q2)

For a recycling project, Ali collected 17 bottles, Bala collected  $2m$  bottles and Carl collected  $(2 + m)$  bottles.

Statement	True	False	Not possible to tell
Bala collected more bottles than Carl.	✓		

$2 \times m$  is more than  $2 + m$ .

If  $m = 8$ ,

Bala collected  $\rightarrow 2 \times 8$   
 $= 16$

Carl collected  $\rightarrow 2 + 8$   
 $= 10$

If  $m = 2$ ,

Bala collected  $\rightarrow 2 \times 2$   
 $= 4$

Carl collected  $\rightarrow 2 + 2$   
 $= 4$

#### READ
